Upload Tracker — how it works

Coding with Ree · a posting + brand-deal tracker for one YouTube channel

On track?
Uploads this month vs. your monthly goal

Posting weekly?
Current streak, last 8 weeks

Deals status?
Collabs from pitch to paid

Need a report?
One click to Excel or CSV

1 VERSION 1 — RUNS IN THE BROWSER

EVERYDAY USE

React UI
Dashboard · Videos · Collabs · Export → **Storage module**
the only code that touches storage → **localStorage**
this device only

EXPORT

Export page
pick month, pick file type → **SheetJS**
builds the workbook → **.xlsx / .csv**
downloaded to your device

2 VERSION 2 — SYNCED TO YOUR GOOGLE ACCOUNT

SIGN IN

Sign in with Google

↓

Firebase Auth
verifies it's you

↓

Same storage module
now points at Firestore, not localStorage

↓

Firestore
users/{you}/videos, /collabs, /settings

AUTO-PULL

YouTube Data API
read-only, your channel only

↓

Checks your uploads playlist
first run: your whole history · after that: just what's new

↓

New videos appear automatically
title + length pulled in, type guessed from length

3 DAY TO DAY, ONCE YOU'RE SIGNED IN

1. Post a video on YouTube
2. Open the app, or tap "Sync now"
3. It shows up on the dashboard — no typing
4. Check your goal, streak, and calendar
5. Move brand deals through Collabs
6. Export the month as Excel when you need it

React + Vite · React Router · Firebase Auth · Firestore · YouTube Data API v3 · SheetJS · date-fns
